Subscriptions for 2023 are now due. There will be no increase in subscriptions for 2023. We do value your membership and seeing you at meetings each month.

RATES – One membership covers all groups

Family Membership	\$38.00
Single Membership	\$30.00
Junior Membership	\$22.00

Account Details: BankSA Glenelg. BSB: 105-145 Account No.: 545457040
(Use your grower number for Reference)

President's Message

The South Australian Orchid Fair was held over the weekend of 10th & 11th of June and credit must be given to the organisers and clubs who were able to stage and put on a show of such quality in The Campbelltown Function Centre with a different layout than in 2022.

Congratulations are in order for the team behind South Coast's display this year; it was a picture, with a Japanese theme. This theme was an idea that Beth Stronach had as we were taking out the Display in 2022. The Display was again judged as Best Display with 51+ plants and also The Grand Champion Display of the Fair by a very small margin of 0.33 of a point. Congratulations!

The Grand Champion plant of the Fair came from the South Coast Orchid Club Display, *Den. Australian Mia's World*, a Terete type Dendrobium which was over 2 metres in height. This was also Champion Other Genera and was grown by Michael Willoughby and Oui Ju. Other Champions from the display were Champion Australian Native grown by Michael Willoughby and Oui Ju, and Champion Laeliinae grown by Beth Stronach.

This month we welcome to the Main group, Graeme Hazledine to talk about *Epidendrum* Orchids, the new generation and how to grow them. The Daytime chapter will welcome Roger Herraman speaking on Terete Dendrobiums as well as bringing plants for sale and for the Southern Region Group, Rowan Crowhurst will tell you about his Orchid Judging adventure in Tasmania. Pauline Hockey will bring plants for sale to the Southern Region meeting.

We are in full swing of the orchid flowering season and this means shows, Our Winter show is coming up soon on the weekend of July 22nd & 23rd at the Marion Warradale Uniting Church Hall. This year you can sell any plants on the trading table not just Orchids, more details on the show in the Gazette [page 4].

Happy 58th Birthday to The South Coast Orchid Club of South Australia

Successful growing & showing

Michael Willoughby

Happy Birthday

**PAULINE HOCKEY, MARK HOCKEY,
BRIAN LYTTLE, ANDREW CRAIG,
HELEN HUMPHRIES,
BARB SEMMENS**

Is your name in the Birthday Book ?? See Anne Steer

ORCHID CALENDAR 2023

MAIN MEETING

Monday 10h July 2023 8.00 pm
RSL Hall, 4 Prince George Parade, Colonel Light Gardens
Guest Speaker: Graeme Hazledine: Epidendrums, the new generation and how to grow them.

COMMITTEE MEETING

Wednesday 12th July 7.30 pm
The Southern, South Road, St. Marys.

DAYTIME CHAPTER

Thursday 13th July 2023 2.00 pm
Lou Kesting Hall , Dover Square, Brighton South
Guest Speaker: Roger Herraman speaking on *Dockrillia*.
Roger will be bringing Plants for sale.

SOUTHERN REGION MEETING

Sunday 16th July 2023 2.00 pm
Carrickalinga House, Victor Harbor
Guest Speaker: Rowan Crowhurst: His orchid judging adventure in Tasmania. Pauline Hockey will be bringing plants for sale

WINTER SHOW

Friday 21st July to Sunday 23rd July 2023
Marion Warradale Uniting Church Hall , Township Road, Marion

SOUTHERN REGION SHOW

Wednesday 23rd August to Friday 25th August 2023
Victor Central Shopping Centre

SPRING SHOW

Friday 22nd September to Sunday 24th September 2023
Marion Warradale Uniting Church Hall , Township Road, Marion

WINTER SHOW

Saturday 22nd July to Sunday 23rd July 2023

MARION WARRADALE UNITING CHURCH

Church Crescent near the corner of Township Road, Marion

The Committee needs the assistance of the members to volunteer to help on the Trading Table. Sell your surplus plants on the Trading Table, ask Anne for swing tickets and selling sheets at the next meeting. **Reminder:** to sell your plants at the Show you must be a financial member and you must have owned your plant for at least 6 months to display your plants.

PUT IN: Friday 21st July 4.00-5.00 pm.
Plants for Display & plants for Trading Table.

TAKE OUT: Sunday 23rd July at 4.00 pm.

JUDGING: The plants will be judged in-situ in the display.

PUBLIC VIEWING TIMES: Saturday 9 am to 5 pm
Sunday 10 am to 4 pm

Please help make our Winter Show a success by bringing in all your flowering plants. Ribbons and prize money are back.

TRADING TABLE: Please fill out a Sales sheet and tags as normal for orchid plants..

A separate sales sheet and tags with your initials and a number is needed for non orchid plants, (cacti, bromeliads, ferns, etc,) and books.

Changes to last year: If you have 20 or more NON orchid plants to sell, a fee of \$20 will apply and a separate table will be provided for you to man yourself.

2023 AUTUMN SHOW CHAMPIONS

GRAND CHAMPION CHAMPION OPEN DIVISION

Cym. Morris West 'Tinkerbelle'

CHAMPION CYMBIDIUM Under 60 mm CHAMPION SPECIMEN

Jane & Don Higgs (1302)

CHAMPION FIRST DIVISION

C. Hawaiian Wedding Song 'Virgin'

Phil & Anne Steer (514)

CHAMPION SECOND DIVISION

Osp. Sunkissed 'Buttercup'

Helen McIntosh (299)

CHAMPION AUSTRALIAN NATIVE

Den. Australian Tiger

Laurie & Sue Carter (1303)

CHAMPION LAELIINAE

Ctt. Bactia 'Forever Yours'

Oui Ju & Michael Willoughby (1252)

CHAMPION SPECIES

Sngl. longifolia

Peter Haltis (442)

CHAMPION OTHER GENERA not otherwise listed

Phal. Fancy Freckles

Graham & Janette Smith (217)

CHAMPION ONCIDIINAE

Oncsa. Sweet Sugar

Beth Stronach (836)

CHAMPION PAPHIOPEDILUM

Paph. henryanum 'Mouliache'

Oui Ju & Michael Willoughby (1252)

CHAMPION ZYGOPETALUM

Z. John Banks 'Purple Lips'

Jane & Don Higgs (1302)

CHAMPION SEEDLING

Paph. henryanum

Oui Ju & Michael Willoughby (1252)

GRAND CHAMPION
Cym. Morris West 'Tinkerbelle'
Grown By Jane & Don Higgs

+++++ Garard Western Trophy for member Hybridiser's Seedling

Chin Yew Lian Trophy Best Seedling

EXHIBITORS' RULES FOR SHOWS

1. All exhibitors must be financial members of the South Coast Orchid Club of South Australia Incorporated, and you must have owned your plant for at least 6 months..
2. Entries are free.
3. Exhibitors are bound by the Constitution, Rules, By-Laws and Special Show Rules of the Club.
4. The opinion of the judges is final and binding and no objections or discussions regarding results will be considered, with one exception, which is an infringement by an Exhibitor of any of the Club's Rules, By-Laws or Show Rules. Any objection in this case must be lodged with the Club Show Marshall/Secretary.
5. The Club accepts no responsibility for any loss, damage or infection suffered by any plant or blooms exhibited.
6. The Club reserves the right to photograph any of the exhibits.
7. In all matters regarding the arrangement and conduct of the show (with the exception of judging) the Show Marshall/Secretary is the ruling authority.
8. No plants suspected by the Club Virus adjudicators of being infected with virus will be eligible for competition and such plants will be completely isolated from all other plants.
9. The exhibition areas will be closed during the judging. No exhibitors, the public or members other than the Show Marshall/Secretary, Judges of the Club, Associate Judges and other persons appointed to assist in judging will be allowed to remain in the exhibition area during this period.
10. Non-exhibitors are requested not to congregate in the exhibition area prior to judging so that officials can arrange plants and perform other necessary duties.
11. Plants must be labelled with the coloured labels provided by the Club with the exhibitor's number and name of plant. These are available from the Show Marshall/Secretary or his/her nominee.
12. Exhibitors are to ensure that all labelling be neatly and correctly performed in accordance with the procedure laid down on orchid Nomenclature and Registration.
13. All plants benched for judging at the show must be made available to be in the Club display.
14. All exhibits must be benched by the nominated time on the nominated day for judging. The nominated day and time will be published in the Club Gazette in the month prior to the Show.
15. Exhibits must not be removed before nominated time on the nominated day at the end of the Display. The nominated day and time will be published in the Club Gazette in the month prior to the Show.
16. Exhibitors unable to remove their own plants from the show should provide the person so doing with a letter of authorization.
17. Damage caused in transit to the show should be reported to the Show Marshall/Secretary or Registrar of Judges prior to judging.
18. If, in the opinion of the judges, a plant is not worthy of an award or prize in any specified section, then none shall be given.

PREPARING ORCHIDS FOR SALE

1. Select the plants that you want to let go.
2. Clean all pots. Wipe them over with a damp cloth to remove all white residue or salt from the pots. If these pots have been recycled from somewhere else, please make sure all advertising and price stickers are all cleaned off.
3. Check all stakes and add more if necessary and re-tie.
4. Remove old brown husks from bulbs and remove weeds, snails, scale etc.
5. Remove all dry ends on the leaves and shape to a point.
6. Wipe leaves over with a mixture of milk and water (1 part milk to 10 parts water). Do not overdo the milk by adding extra as the fat in the milk will clog the pores in the leaves which will then yellow off and die.
7. Water all plants 2-3 days before, not on the morning that you are bringing them in. This water really makes a mess on our clothes, tablecloths and the floor.
8. Get plant sales sheets and plant price tags from Treasurer beforehand. The sales sheet is a carbonless duplicated sheet, so both sheets are to be used together. Press down firmly on a hard surface to imprint on the second page. The original and duplicated sheets must be lodged with plants. On the top left hand corner of the page, print your name. On the right hand side write in your club member number, Rule a narrow column down the left side of the page. This column is for the plant number 1-30. On the right hand side you need a column a bit wider for the selling price of the plant. The centre section is for the name and colour eg *Cym. Without Peer 'Soft Touch'* (pink). Be reasonable with the pricing, not greedy. Either you want to sell it or you don't. Take into account the number of spikes and condition of the plant. If you are not sure of pricing, ask some one.
9. Next write your labels. It's a good idea to do both sides of the tag. Your member's number goes on the left hand side and the plant number on the right hand side. Circle the plant number. Write your price under these numbers. As you put your tags on the plants, double check that the prices and numbers on the tags match those on your sales sheets.
10. When you bring your plants in, they must be checked off by another person against what you have written on your sheets. You will be given one sheet back along with payment for sales but you may wish to write out another copy for yourself to keep in the meantime. You can help with the checking off by reading out the numbers and price while the person checking checks this information off against what is on your sheets. If there is a discrepancy, it needs to be attended to and another ticket written out if need be.

PLANT COMMENTARY

There were a good number of plants benched across all divisions and it was pleasing to see the second division table with a good number.

ORCHID OF OPEN DIVISION ORCHID OF THE NIGHT

The plant of Open Division was *L. anceps* grown by Vicky and Neil Cooper.

This plant was carrying 15 lovely arching spikes of bright pink flowers, each inflorescence carrying two and three flowers each. The plant was a real stand-out and a beautiful specimen. A very healthy and well grown plant. It was shown on the bench in a pot, but Vicky showed the members how it is growing around a block with all its roots to see.

Congratulations Vicky and Neil.

SEEDLING OF THE NIGHT

Rth. Love Sound x C. Mem. Ellen Littman

Grown by Laurie & Sue Carter

Photo Neil Cooper

ORCHID OF FIRST DIVISION

The plant of First Division was grown by Laurie and Sue Carter and was a lovely plant of *Gom. Moonshadow 'Tiger Tail'*, a member of the Oncidiinae alliance.

It had one long arching inflorescence of bright yellow flowers with a darker brown throat and dorsal sepal. It was a relatively small plant but well grown.

It has several species in its breeding with *Gom. concolor*, *Gom. varicosa* and *Gom. flexuosa* being the most dominant.

Well done Laurie and Sue.

ORCHID OF SECOND DIVISION

The plant chosen by the Judges was grown by John Harris. This was a relatively small plant of *Rlc. Makaha Gold* x *Ctt. Chocolate Drop*.

The flowers were clear and bright and with attractive dark orange segments and a contrasting yellow labellum and a red fringe. The two inflorescences each carried five flowers.

Congratulations John.

Thank you to our Judges for a job well done!

Good Growing !

Phil Steer Registrar

DAYTIME CHAPTER

Thursday 8th June, 2023

Hi everyone,

Our daytime group was attended by 14 members with a special welcome to Trevor and Margaret Jacobs.

Our guest speaker Trevor Jacob with assistance from Phil Steer demonstrated the processes they used to split and repot a large *Cattlianthe Meadii* grown by Val and Keith Bleechmore. Following this informative display Trevor guided an enthusiastic member's workshop repotting their plants. Thankyou Trevor for your time and endless knowledge.

Trevor Jacob and Phil Steer with plant before dividing.

The divided plants

Trevor Jacobs assisting Patty Abell with repotting her Phalaenopsis

Phil Steer provided an overview of Flower of the Day, (*Viag Miltinia*) grown by Val Beechmore.

Val Bleechmore with her Flower of the Day, *Viag. Miltinia*

Many thanks to Coral and Val for their assistance and to our generous members for providing raffle plants.

Our daytime meeting offers an option for members unable to attend the main meeting, all welcome including potential new members.

Next Meeting

Guest Speaker: Roger Herraman discussing **Dockrillias**. Roger will have a variety of plants for sale..

Thursday 13th July – 2pm,
Lou Kesting Hall, South Brighton

Alan Miller

0434 052 676

Anne Steer Richard Crinion

SOUTHERN REGION MEETING Sunday 18th June 2023

Convenor, Chris Heysen, opened the meeting at 2.00 pm welcoming the 30 members present – with a special welcome to 2 new members, Heather McDonald and Ruth Creedy. And welcome to Guest Speaker, Les Nesbitt (and his partner May). Les has been a leading orchid grower and nurseryman for many years, and a long-time member of OCSA and of NOSSA. Today he will be talking about species orchids that he grows – and he has plants for sale.

Apologies: Helen Humphrys, Marilyn Jelf, Christine Robertson and Alan Clayton.

Thank you to Phil Steer and Anne for running the the Learners Group session for today.

Guest Speaker: Our Guest Speaker, Les Nesbitt gave us a fascinating insight into the world of species orchids. He divided his talk into sections ranging from easy to grow in our conditions to those requiring special care and conditions. The latter include orchids from tropical or alpine conditions that are difficult to emulate in our climate but also includes orchids from our own region that have very specific needs to match those found in the wild. Thank you, Les, for a very informative talk.

Birthday Prize: Janette Smith.

Lucky Name Badge: Dudley Huxtable

Lucky Door Prize: Lyn Heysen

Announcements

1. Chris thanked members for responding to his call last month to bring in more plants for the show bench at club meetings. Today's display is a credit to you all.
2. Anne Steer gave us a report on the recent SA Orchid Fair – and especially on the success of the SCOCSA Club display in winning the Champion Display.
3. Anne also reported on the upcoming Winter Show – details elsewhere in this Gazette.

The raffle was held as usual and Chris thanked the donors of raffle prizes.

Judging: Phil Steer and Don and Jane Higgs.

Judges Commentary: Phil Steer.

Chris Heysen

The meeting closed at 3:15pm and was followed by everyone joining in to share a cuppa and a selection of cakes and biscuits.

Next meeting – Sunday 16th July, Guest speaker will be **Rowan Crowhurst**. Long time members will remember Rowan who in his student days was a frequent visitor to our club. Rowan is a qualified orchid judge and extremely knowledgeable grower. He will be talking about his judging exploits. He will also be leading the Learners group on that day.

Pauline Hockey will also have her plants for sale at this meeting including compots, single plants of various sizes and a range of plants in flower.

June Results List

Ref. No.		Points Awarded
First Division		
Australian Native Epiphyte - Hybrid		
359	Den. Anne's Rainbow 'Surprise'	Genny & Dudley Huxtable (279) 3

SOUTH AUSTRALIAN ORCHID FAIR South Coast Orchid Club Display CHAMPION DISPLAY

PLANT COMMENTARY SOUTHERN REGION GROUP

This month saw a nice cross section of plants benched, all of which were all of good quality. We saw the start of the Cymbidium flowering season with a number of nice plants.

ORCHID OF SECOND DIVISION & PLANT OF THE DAY

The plant chosen by the Judges was a very well grown example of *Cym. tracyanum* grown by Andrew Craig.

It had five long arching spikes of lovely flowers with stained red-brown sepals and petals with a distinctive white labellum. *Cym. tracyanum* always is a delight to see in full flower. This is a relatively easy species to grow and is a lovely addition to any collection.

It originates from Northern and Eastern Burma, Northern Thailand and Laos into Yunnan province in China. It has been used extensively in the production of hybrids and has some 12,190 progeny.

Congratulations Andrew.

ORCHID OF SECOND DIVISION ORCHID OF THE DAY

Cym. tracyanum
Grown By Andrew Craig
Photo Jane Higgs

FIRST DIVISION

The Plant of First Division was grown by Eileen Pinnock and was *Grandiphyllum (Gdp.) divaricatum*.

It was a plant of specimen proportions of sprays of tiny yellow flowers covering the foliage. A really spectacular sight. Each branch carried several flowers with pale yellow and brown markings.

This species comes from Southern Brazil and Northern Argentina and is a member of the Oncidiinae family. This plant is a regular annual flowerer and Eileen has it in just the right environment.

Well done Eileen.

Thank you to our Judges, Jane & Don. for a job well done!

Orchid Culture Notes for July

As cold and wet as July can be there is plenty happening in the orchid house. With Spring only a mere few weeks away our plants will soon be picking up the gradual lengthening of days and will soon initiate the beginnings of a new season. How short is a year of orchid growing?

Protection of your plants still remains a priority this month. With many plants in spike or in the process of initiating spikes we must ensure we keep up the protection from the elements, pests and diseases. It is definitely a time also to observe your collection, identify any problems occurring and act now, not later, when it is too late.

Both the middle of Summer and the middle of Winter are the times of the year where the stresses of our climate show up the most in our collections. This time of year it is the effects of being cold and wet that wreaks havoc. Root loss is common, yet the effects may not show up for some time and usually when it does in some cases can be too late. Fungal spots become evident, leaves yellow and drop off and watery patches creeping up the leaf are signs all is not well. Bulb rot is usually quite severe this time of year. Plants from climates where the Winters are dry will suffer the most. A plant will survive cold temperatures if kept on the drier side but the same cannot be said if they remain wet.

Many problems in the collection can be reduced or eliminated with good culture and a diary. We all know that pests and diseases generally attack weakened plants first. If these pests and diseases are prevalent take a good look at your collection and your environments, both in and around the orchid house. Common problems are poor culture and lack of protection, the wrong plants growing in the wrong spot, insufficient light, overcrowding, too much shade, poorly drained mediums, over wetness and dryness and so on. All of this weakens your plants and makes them more susceptible to pests and diseases. Don't be afraid to get someone in and look at your collection if you have some problems. Many a time a fresh set of eyes will soon point out something you can't see.

In the shade house July will see the peak flowering of the Oncidium complex and even now new growth can be seen forming at the bases of last year's made up bulb. After flowering most of these do need a rest where watering is reduced for a while and feeding stops. Don't dry out fully though. Many bulbs will shrivel after flowering and drop a leaf or two. Roots will also seal off. This is normal with some Oncidiums so don't panic. Inexperienced growers usually reach for the hose, thinking the plant is thirsty and end up wiping out the root system so the poor old orchids ends up putting all energies in re-establishing a root system. There are also plenty of Oncidium intergenerics around that are worth a go and some of these can be out in flower nearly any month of the year. They certainly give you an extension to your growing season, a bit like what the hot/cold natives give to the normal native epiphyte flowering season. A few examples of some of the easier ones are the Colmanaras and Beallaras, Wilsonaras and the Burragearas. They are easy to flower and grow in our climate but do better with cover this time of year.

Zygopetalums are still flowering on and off. Keep these evenly moist and feed every fortnight at half strength. Whilst Winter slows them their metabolism does not stop completely. Just like a cymbidium, most Zygopetalums are always doing something whether its flowering, developing and maturing new growth or initiating new growth. As Zygopetalums flower off new growths the accent to feeding these would be something a bit more nitrogen to build up that new growth after the stresses of flowering. Try and spray with fungicide every 2 months or so if spotting on the leaves is severe. Try some of the newer breeding and intergenerics as they appear to be less likely to spot. For example the Zygonerias are producing nice clean compact plants. There is not much in the way of pests with Zygopetalums until Spring when the looper caterpillar parade kicks in. Keep slug /snail pellets in and around the Zygopetalum pots, especially those in spike. Big fat Zygopetalum spikes are high on the slugs menu tonight.

We start seeing more of the standard Paphiopedilums on the show bench from now on. These also need protection over winter, especially those in spike. Slugs will soon make a meal out of a spike. Even a slight chomp will severely hamper the flower development and most likely cause the spike to break under the weight of the flower. Keep water, snail pellets and fertiliser out of the axils as these will encourage rot and considering you usually only get one flower per growth it is a long wait till next year to see your plant flower. Keep moist, fertilise fortnightly at weak concentrations and don't forget to flush the plants pots occasionally with rainwater to wash out the salts. It is a pity we don't see as many of the standards as yesteryear as more growers lean towards the novelty and multi floral type. For those wanting to branch out into Paphiopedilums see if you can grab a piece of *Paphiopedilum insigne*. These are a great beginner's Paphiopedilum to start with.

Flowering of the Laeliniiae complex has thinned out and it is usually the species *L. anceps* and the very showy long stemmed variety chamberlains most often seen at this time of year. These are easy to grow and the flowers last a long time and don't the slugs love them. Keep them moist as well. In nature they are often wet and very cold at night and handle our winters well but the delicate flowers must be protected otherwise they spot badly. After flowering they send out another lot of new roots as well so the plant can replace its reserves ahead of the new growing season. I feed with a balanced feed of Miracle Grow and Powerfeed, and if not the Powerfeed then use some Seasol to aid the root development. They grow in plain medium bark and they do well as a hanging plant. I have tried coco peat as an additive and that will be the first and last time! The roots I have found with my culture do not like it with the roots aborting the moment they touch it. This is one of the most important aspects to growing and it is called observation. The coco peat has been washed thoroughly and I have mostly watered with rainwater and these plants were rarely fed after division last Spring so it is not salt that is causing the problem. Regardless if I leave them any longer I might as well bin them now. Autumn flowering plants are relatively dormant now but the Spring flowering ones are growing well with new roots and maturing growths. Needless to say these plants are grown in a warmer protected environment. For the newer growers it is best to stick with those Cattleyas and related genera that flower in the late Summer to early Winter. Their growth period is over our Spring and Summer and their dormant period is over Winter. As long as they are kept on the drier side with some cover they handle Winters well.

Now is the time Cymbidiums that flower in Spring will soon break sheath and this is the most important time for them. Not only do we need protection from slugs and snails and the rain that will mark our buds we also need to look at how we are going to train them. Whether we are aiming for a straight, decorative or pendulous habit now is the time we start to train them. If you have a new Cymbidium to your collection and you are not sure about the habit of that particular clone or species, ask around. Trying to stake a Cymbidium against its habit will only lead to heartache and a funny looking spike. Another area where the newer grower's fail to some extent is managing the colours. It is not that important yet as they break sheath but a bit later on as they lengthen the correct light or lack of will have a huge bearing on the flowers and the colour. We will have more on this later. Feeding your Cymbidiums now switches to something with a little more nitrogen in it as you should start seeing new growths initiating.

Native epiphytes also break sheath now and also need cover, a slug baiting programme and watch out for aphids as they home in on the new buds. If possible get them under cover even before they break sheath for best results. Terrestrial orchids will start flowering in greater numbers now. Keep these moist too but avoid over wetness as they are prone to damping off, especially in poorly drained mixes. For those growing the South African terrestrial species *Stenoglottis* cut off the flowering spikes now, even if they are in flower to force a short but beneficial rest. Remove rotting leaves and dry out slightly. Avoid disturbing these plants to ensure better flowering.

Weeds are usually a problem over Winter so make sure you remove them before they flower or get too established in the pot. Their fine roots will break down mixes more rapidly and reduce the all important drainage. Oxalis is a real pest in this regard, especially if left to grow a taproot that is very hard to pull out. That sees out July. In general like June, this is a protection month with more emphasis on protection than anything else as many more plants begin their flowering season. Next month is August and before months end the first warmish days that remind us that Spring is just around the corner.

Steve Howard

ORCHID CLUBS IN SOUTH AUSTRALIA **General Meeting Times**

THE SOUTH COAST ORCHID CLUB OF SOUTH AUSTRALIA: Whilst COVID restrictions are in place the Club meets on the Second Monday of the month at RSL Hall, 4 Prince George Parade, Colonel Light Gardens. at 8.00p.m.

THE DAYTIME CHAPTER: meets at the Lou Kesting Hall, off Broadway, South Brighton on the second Thursday of the month at 2.00p.m.

THE SOUTHERN REGION: meets at Carrickalinga House, 17-19 Torrens Street, Victor Harbor at 2.00p.m. on the 3rd Sunday of the month.

THE ORCHID CLUB OF SOUTH AUSTRALIA: meets at 8pm in The Enfield Community Centre, 540 Regency Road, Enfield on the 1st Thursday of the month.

Daytime Group: meets from 2.00p.m. to 4.00p.m. in the Enfield Community Centre, 540 Regency Road, Enfield on the 2nd Friday of the month.

THE MURRAY BRIDGE AND DISTRICT ORCHID CLUB: meets at 1.45pm in the Seventh Day Adventist Hall, corner Myall Avenue and Standen Street, Murray Bridge on the 4th Sunday of the month.

NORTHERN AND EASTERN DISTRICTS ORCHID SOCIETY: meets in St. Philip's Church Hall, Galway Avenue, Broadview from 7.30p.m. on the 3rd Thursday of the month.

THE SOUTH AUSTRALIAN ORCHIDACEOUS SOCIETY: Meets at the Plympton Community Centre, 34 Long Street, Plympton from 7.30p.m. on the 3rd Wednesday of the month.

THE NATIVE ORCHID SOCIETY OF SOUTH AUSTRALIA: meets at 7.30p.m. at St. Matthew's Church Hall, Bridge Street, Kensington on the 4th Tuesday of the month.

THE CYMBIDIUM CLUB OF SOUTH AUSTRALIA: Meets at 7.30p.m. at Burnside Community Centre, 401 Greenhill Road, Tasmore on the 4th Wednesday of the month.
