Club Display At the SAROC Fair

Welcome to our New Member

Neil Shirley

For sale(s)

John Jacobsen has a shade house and entire collection of plants etc. for sale
Contact John on 82988948

Jim Shaughnessy has some 40-50 bread trays (Legal) for sale at \$2.00 each
Contact Jim on 0419380126

South Coast Species Group

Some of the orchid species on display from top left
Cym. Erythrostylum
Schoenorchid fragrans

This month we had a couple less members than usual however some great species were brought for discussion. The most unusual and appreciated orchid for the night was *Schoenorchis fragrans* brought by Peter Galpin.

We are intending to have a show this year and ideas were discussed at the meeting . It is hoped to have a 2 day show in connection with the South Coast Spring show. More details will be provided in due courses.

Ron

Help

We need another SAROC Delegate to assist the organising Committee - Please See Murray for details

Second Division

Flower of Division:

Cym. Warringah Spring
grown by Terri Rees

Open Division & Flower of the Night

Flower of Division:

Rssgls. grande
grown by Peter and Geraldine Flavel

First Division

Flower of Division:

Paph. insigne
grown by Murray Baulderstone

Second Division Results June, 2002

Phalaenopsis Standard
Phal. Gabriella x *Dtps* Modern Beauty Trevor Garard 3

REPORT FROM YOUR PRESIDENT

Since the last Bulletin several significant events have taken place.

I report as **follows**:

S.A.R.O.C. FAIR

Members of your Club, along with most Clubs of the Metropolitan and Country areas, took part in this event.

It consisted of a series of displays of varying sizes in area, the smallest being of 12 plus plants up to those in excess of 50 plus orchids & 5 commercial outlets from plants to growing aids. The aim of the Fair was to bring to the public the beauty and quality of our hobby, together with the opportunity to purchase plants and aids to achieve similar results in their own home garden. Organisation of the event set out to achieve the fellowship and mutual interaction of the members of S.A.R.O.C.

This end achieved and they can be very proud of the event and I believe that each year it will grow in size and participation.

Saturday night Dinner was an excellent evening, we were fortunate to have Murray Eldridge, National President of the Australian Orchid Council as Guest Speaker who shared with the 63 people present his views on Orchid growing in the Eastern States and where he believed Clubs are going and should be in the future, a very enlightening and challenging talk. (Subjects that your Club Committee will examine and develop in the future).

Many of your Club members took part in displaying their plants and competing in competition. I acknowledge them for their involvement as follows:

W. & R. Clark, D. Cammack, T. De Ionnio, P & G. Flavel, L. Gunn, D. & J. Higgs, G. Shevlin, R. & I. Parish, R. & B. Wilson, N. Woodend, G. Voskamp. Don and Jane Higgs' plants of Native Terrestrial received nomination for the Bill Murdoch Trophy, an A.O.C. Award.

Most of these exhibitors were successful in obtaining prizes for their plants, my personal congratulations are extended to them all. As a Club, we were the most successful in obtaining Certificates for Best Display of 30 or more plants together with Certificate and Rosette for Champion Display of the Fair, an excellent achievement.

Most of the credit for this achievement belongs to the following individual persons, along with the members listed above, who supplied plants, they being:

L. Gunn, J. Higgs for the theme used and assisted by N. Woodend and G. Voskamp as the labour force under direction of Jane to assemble the display. It would be remiss of me not to

acknowledge Ron and Irene Parish for the technology and production of the prize cards and lastly, but not least, Don and Jane Higgs as our S.A.R.O.C. Delegates for their commitment to assisting to achieving a memorable Annual Fair and the development of S.A.R.O.C. a future that is now assured.

Your Species Group met following the Fair and whilst attendance was small, input and actions took place, these being: Photos of the display— page 2.

Welcome to Neil Shirley from Stirling a devoted species grower as a new member.

Jim Shaughnessy of Mount Gambier was able to attend and report the following "that a colony of the Underground Orchid has been discovered in the South-East of S.A". and a photographic record is to be taken. Jim has also applied to A.O.C. for some assistance in defining the precise location of the colony. (It was interesting to read in the current issue of Australian Orchid Review, an article by David P. Banks of the Underground Orchids in Australia of another rediscovery and plants known in Western Australia.

The Species Group bench at each and every meeting, orchids being grown by Club members in their collections. These are discussed, photographed and recorded. This group wishes to mount and display at one of our future shows.

At our meetings, you will have seen a raffle in progress for 2 bags of Orchid Bark to raise funds for Prize Cards and perpetual trophies appropriate to Species Orchids exhibited. It is planned to draw this raffle in September.

We will commence another raffle to be drawn at Christmas as a fundraiser. The donor of the 4 bags of Bark as prizes was Jim Shaughnessy.

MONTHLY MEETING:

An excellent display of plants benched, the prizes achieved (noted elsewhere).

Trevor Jacobs, Guest Speaker, gave an interesting talk on Orchid History and says we have only heard part of the information, we may ask Trevor to complete the balance in the near future.

DAY TIME GROUP:

The writer convened this group as the regular Co-ordinator, Jane Higgs, was on the sick list and we wish her a speedy recovery.

22 members were in attendance and were entertained by Ron Parish who gave us some sound knowledge on photographing orchids and the use of a Digital Camera and a Computer to store and replay our plant records. This talk was concluded by the showing of plants/ flowers of the Cattlya Alliance using the techniques explained above. Thanks Ron for a most informative session. The next meeting Don and Jane Higgs will explain "Conservation at the Higgs' Property".

Thank you members for your involvement in your Club and in conclusion, draw attention to a visit to the collection of G. Abell (Club Member) where George will explain his techniques in the growing of the genus Sarcocylas. This event will take place on November 17 2002, details in a later Bulletin.

Cymbidium erythrostylum

This plant is grown by John Nicholls
And carries the clonal name of 'Magnificum'
and it has been used by hybridists as a parent
in breeding.

This species comes mainly from Vietnam
where it grows as a terrestrial lithophytic
and some times epiphetic plant.

It will grow happily along with other Cymbi-
diums.

Sponsors for our Club

We wish to thank the following persons who have supported us and our
shows with donations etc.

Members are requested to keep these people in mind when purchasing
orchids and supplies
